SUMMARY

I am a creative, detail-oriented IT engineer and front-end developer with extensive experience in designing engaging user interfaces and web experiences. I am proficient in HTML, CSS, Bootstrap, and JavaScript, with a deep understanding of jQuery for dynamic web applications. I specialize in developing robust and scalable applications using React.js and Next.js frameworks, and I am proficient in state management with Redux. I am skilled in Material UI to design visually appealing and responsive user interfaces. I am passionate about UX/UI design principles, with a strong focus on creating user-friendly, user-centric designs. I am committed to writing clear and maintainable code and keeping up with the latest web technologies and design trends. I also have extensive experience in data analysis, data entry, and reporting (Excel and Power BI).
